Dependable performance

Citywide is a diverse company delivering the full scope of civil infrastructure, open space and environmental services to government and private industry. We have a wealth of localised knowledge and strong partnerships across major Australian cities.

Citywide has consistently demonstrated leadership in sustainable waste management. Continually researching international practices, we have informed the development of government management plans and pioneered adoption of alternate fuels and techniques.

Flexible solutions

Providing a completely integrated waste services solution, Citywide Environmental offers a variety of collection methods to Australian businesses.

The Front Lift service complements our commercial waste service to commercial and industrial sites. We offer a safe, efficient and value for money service to businesses and workshops in diverse industries such as manufacturing, warehousing, hospitality and distribution.

Front Lift bin sizes range from 1.5m³, 3m³ and 4.5m³. Weather resistant, all bins can be kept inside or exposed to the elements. They can also be fitted with a variety of accessories to ensure convenience and ease of use such as lockable lids and steel casters.

From general waste to plastics, paper and cardboard, Citywide offers the full scope of collection services.

We adapt waste management services to meet your specific requirements. As well as the front lift bins we provide and collect 240, 660 and 1.1 litre containers and a range of skip bins. We cater to customers who generate small to mid-sized quantities of waste and have less storage space.

Our service can support your business at each stage of its growth.

24 hour Customer Service

Citywide's 24-hour customer service centre provides one contact point for all work requests and emergency response activities. Call us today on 1300 136 234 or send a request via our website at www.citywide.com.au.

Sustainable solutions

Citywide offers advice to business and government in sustainable management practice. Drawing on diverse experience and the expert knowledge of our people, we help our customers meet the demands of an energy and waste conscious society.

Our expert consultants improve efficiencies, reduce costs and minimise your environmental footprint. Customers will appreciate your efforts to tackle climate change.

Citywide bins come in 240L, 660L, 1.1L, 1.5m³, 3m³ and 4.5m³ and skip bin configurations and are ideal for a variety of commercial and industrial sites and businesses such as manufacturing, warehousing, distribution, workshops and hotels.

These containers have multiple uses including the collection of commercial recycling materials, such as paper, cardboard and glass and commercial waste collection.

Citywide's innovative approach to waste management has also seen the introduction of plastic 1.5 cubic metre Front Lift bins. Advantages include: lighter weight; easier to move; compliant with new OH&S hard waste guidelines and gravity lock (you only pay for your rubbish).
