

FACT SHEET

CORYMBIA MACULATA (SYN. EUCALYPTUS MACULATA) |

‘SPOTTED GUM’

- Origin:** South-east Queensland and coastal New South Wales.
- Habit:** Large evergreen tree, normally with a long, single straight trunk supporting a dense, broad domed canopy. Fast growing it can attain a height of 12-15 metres over a 30 year period.
- Description:** Slightly glossy leaves are mid-green above and lighter green below. White flowers borne in May through September. Smooth-barked with spotted or mottled various shades of grey.
- Tolerances:** Adaptable to a wide range of climatic conditions and soil types, though prefers well drained sites. High drought and pollution tolerance.
- Notes:** Requires formative pruning yet makes a handsome large tree. Suitable for avenues or on large sites planted in groups.
