

FACT SHEET

CORYMBIA CITRIODORA (SYN EUCALYPTUS CITRIODORA) |

'LEMON SCENTED GUM'

- Origin:** Queensland, from coast to tablelands, north of Maryborough.
- Habit:** Large evergreen tree. Variable in form though usually broad domed. Mature dimensions range between 12-15 metres over 40 years. Fast growth rate.
- Description:** Leaves narrow green. Distinctive citrus scent when crushed. Bark smooth, grey to pale grey, light pink or beige rarely white in Victoria. Flowers white in appearing December through January.
- Tolerances:** Adaptable species, grows in a range of soils. Moderate drought and water logging tolerance. Susceptible to foliar and sap sucking insects.
- Notes:** Formative Pruning is required. Tree does shed limbs.
